## About Me

---

I am a Computer Science student eager to immerse myself in the world of software development as an intern.

**Languages** C#, HTML, Python, SQL, Excel

**Technologies** Git, GitHub, Google Colab, Visual Studio, MS SQL Server

## Education

---

### College

#### Mapua Malayan Colleges Laguna

Bachelor of Science, Computer Science (GPA: 1.45)

2020 - Present

**Honors:** DOST JLSS Scholar, Iskolar ng Laguna

**Related Coursework:** Computer Programming Concepts, Data Structures and Algorithms Analysis, Concepts in Object Oriented Programming, Information Management, Web Systems and Technologies, Architecture and Organization, Introduction to Data Analytics, Software Engineering

## Projects

---

### Hotel Booking Web Application

ASP.NET, Bootstrap, C#, MS SQL Server, Visual Studio

Developed a Hotel Booking Web Application using C# for the back-end with Bootstrap for the front end. Users were able to search, view, and book rooms. MS SQL Server database is integrated into the Web App to store user and booking data. Users were also able to receive email notifications and confirmations via SMTP client.

### ASL Alphabet Detector

Google Colab, Python

Developed a model that was able to accurately detect and identify letters represented by the hand in American Sign Language.

## Certifications

---

### NSE 1 Network Security Associate

Certification number: Wly89pPICa

Fortinet NSE Certification Program | 2023
